

Q 60

DEC/2010

PVC
SYSTEM

CLASS "A" PROFILE SYSTEM WITH 3 MM WALL THICKNESS AND CLASSIC ELEGANT LINES, PRODUCED WITH ENVIRONMENT FRIENDLY CALCIUM-ZINK STABILIZER

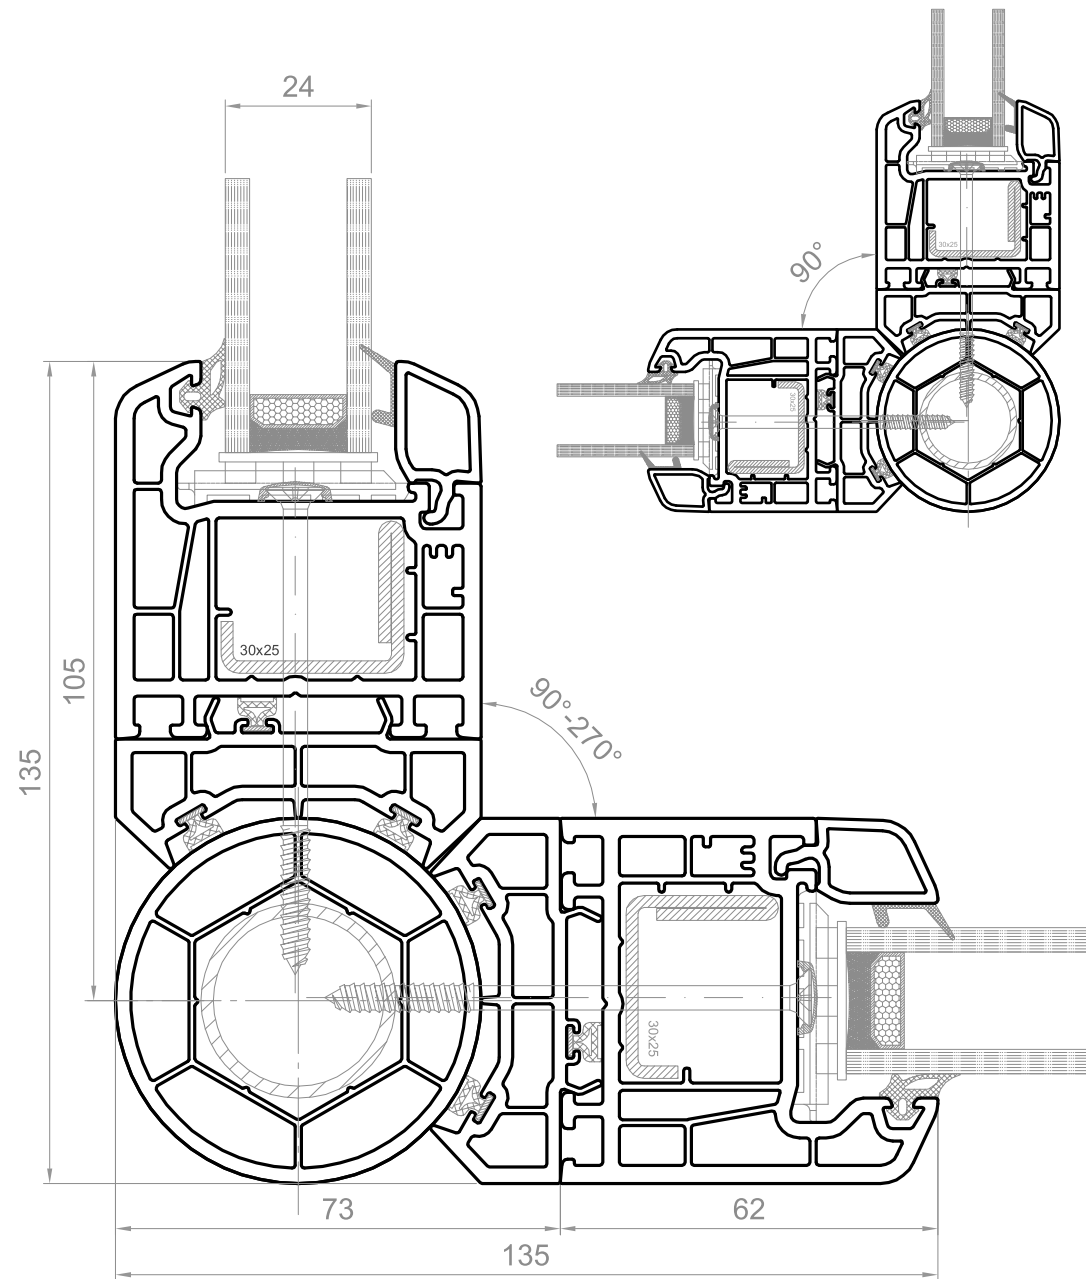

The use of raw materials delivered from well-known and proved European suppliers and the permanent control in the production makes us confident in the reliable performance and high quality of the windows produced with our profiles.

The installation of the hardware in the window sashes as in the door profiles is extremely easy and secure.

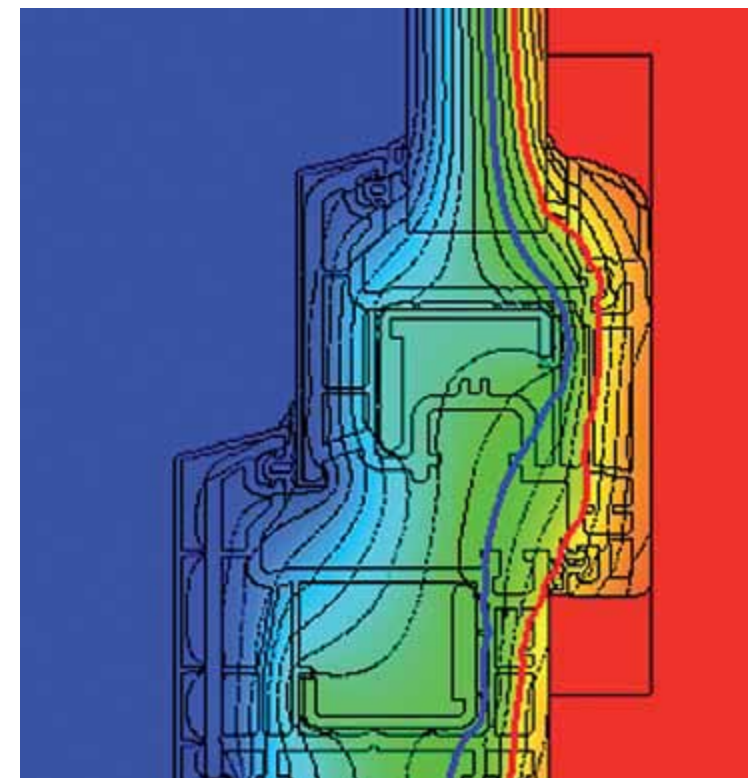

The fasteners are bearing hardware parts through two walls of the profiles and through steel reinforcement.

Q60 PVC SYSTEM IS DESIGNED TO PROVIDE A COMPLETE SET OF PRODUCTS ALLOWING TO ACHIEVE RELIABLE SOLUTIONS FOR EVERY PROJECT.

The four chambers and the mounting width of 60 mm ensure the high thermal and sound insulation of the profiles. The combination with appropriate glazing system provides a product with excellent insulating characteristics.

The heat transfer index of a Q60 window is $U=1,33 \text{ W/m}^2\text{K}$ and the sound reduction index is $R_w=37 \text{ dB}$.

A COMPLETE RANGE OF PROFILES AND ACCESSORIES
ENABLE VARIABLE ARCHITECTURAL SOLUTIONS.

THE ALUMINIUM COVER CAPS DESIGNED FOR Q60 ARE GIVING THE OPPORTUNITY FOR UNLIMITED COLOUR SOLUTIONS FOR EVERY FAÇADE.

THE CLASSIC LINES OF THE PROFILE FIT INTO THE APPEARANCE OF THE FAÇADE. THERE IS ALSO A WIDE VARIETY OF DECORATION FOILS MANUFACTURED BY COVA AND RENOLIT IN COLOURS AND WOOD DECORS.
